## The Hedonism Obsessed Bunch Of Shamans

On the spring of 2004, The Hobos began their musical explorations. With the core sound being heavy rock, the progressions are mostly based on various Indian ragas . The music tends to be experimental and having shades of the Indian sub culture .Apart from having won major competitions and playing gigs across the country, the band has won a credible audience appreciation and repute for their original scores and high energy live gigs. The band is currently working towards a full length kickass album.
