

No Era

NO ERA is :-

NOel on guitar and vocals,
Ezra on bass,
Raghu on guitar,
Ashok on percussion.

NO ERA songs deal with bringing up children and their parents in an aesthetical and efficient manner. These are possibly two of the most important aspects of a tolerant and progressive society, which Lennon immortalized in Imagine.

Though these songs were conceptualized and composed in the late 1970' s, the 'folkish' , classical-rock based compositions, with execution by 23 year unbeliavables , accentuates the original flavour of the music with a new age zest that is refreshing and influential.

There is also a possibility that no one else in the world has ever saved songs for over 30 years, making this a historical situation.

Fire your patience, fit a cap
and walk through the valley .
Tell your parents ,
Where you are,
or you might land up,
Being a poor man.
The thing in being is,
Give till there is no more.

If you are tired ,
Take a breath .
Take a deep breath .
Relax yourself.
We have Just warmed up .

As you carry on
With your journey
Gotta wish hello everybody
And maybe they would
Help you start again.
Upon Tiger Hill ,
Someone suggested some rest ,
But the memory will remain
When you count on your fingers
You really will have no time .

Making Music You Will Understand.
